

EAST COAST GREEN VIRTUAL 2-DAY CONFERENCE FRIDAY, APRIL 22, 2022 AND SATURDAY, APRIL 23, 2022

Now, more than ever, the connection between wellness and our environment is critical to understand, communicate and align in our designs and buildings. The pandemic has brought the vulnerability of our health and environment to the forefront of the conversation. We have seen air and water quality notably improve during times of reduced human activity. This eliminates any doubt that our typical lifestyle behavior has a lasting and substantial impact on our environment. The American Institute of Architects New Jersey, New York State, and Pennsylvania Chapters of the Committee on the Environment have created the East Coast Green Conference to bring together professionals from numerous industry segments to discuss the future of design in an age where wellness and climate change demand equal attention. East Coast Green presents some of the most prominent regional players in sustainability, to speak on a wide variety of topics of interest to the design and construction industry.
